NABCEP Certified Solar PV Installer™

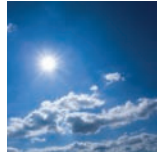

How will you know which alternative energy is right for you?

RUGGED

RELIABLE

RENEWABLE

Solar Action Program As non-profits, schools and local governments cannot take advantage of the federal tax credits or grants, and accelerated depreciation schedules, Bold Alternatives created the Solar Action Program. ACTION is the key. Bold Alternatives designs and installs the solar PV system. With our power purchase agreement, you get the benefits of solar without the upfront cost. Contact us today for more information about this tremendous program.

Bold Alternatives offers commercial, residential and public sector solutions specifically designed to meet your needs. Following a proven process, our knowledge, experience and analytical tools combine to deliver a system to minimize your power consumption, and deliver tangible long-term financial payback. Our goal is to assist you in realizing the greatest possible return on investment. As local experts, we provide consultation, installation and ongoing support throughout Northeastern Ohio.

RESIDENTIAL

Our Residential services help you isolate and capitalize on alternative energy opportunities. We can help you gain independence from utility companies, leverage Governmental rebates, and maximize financial returns.

COMMERCIAL

Our Commercial services offer alternatives to reduce the effects of rising utility rates, drive down operational costs, and take full advantage of government rebates and tax credits.

PUBLIC SECTOR

Our Public Sector services develop responsible solutions which benefit the community and the environment. By reducing operating costs, lowering maintenance costs and delivering long-term reliability, clients can reduce energy consumption.

Our Services include:

1. Initial Consultation
 - a. Discussion of needs and goals
2. Complete Site Analysis
 - a. Alternatives Education
3. Program Creation
 - a. Exploration of alternative solutions
 - b. Feasibility and cost guidance

4. Implementation
 - a. Assistance in navigating permit processes
 - b. Governmental rebate/tax credit assistance
 - c. Program Installation
 - d. System Education
5. Ongoing Services
 - a. Site monitoring
 - b. Information reporting
 - c. Continued consulting

Homeowner Example:

A common system costs about \$20,000.

Total System Cost:	\$20,000
State of Ohio Grant:	-\$9,000
*Federal Tax Credit	-\$6,000
Actual Cost:	\$5,000

Commercial Example:

The rebates and incentives available to businesses are slightly different than those available for residential. A common system for your business costs a little less than \$200,000.

Total System Cost:	\$200,000
State of Ohio Grant:	-\$100,000
*Federal Tax Credit	-\$60,000
Actual Cost:	\$40,000

Depending on certain situations these investments may also qualify for accelerated depreciation.

*As of rebates offered in the state of ohio 2009.
